

## U.S. Army Extends Agreement with nFocus Software

**PHOENIX, AZ September 9, 2009** The U.S. Army has extended its maintenance and support agreement with [nFocus Software](#) for the TraxSolutions Student Management System, which is customized for the Army Digital Training Management System, or DTMS. The DTMS has been in use by the Army since May 2004.

nFocus Software's [TraxSolutions](#) is the official and mandated training system for the U.S. Army, and currently houses training records for over 1.2 million soldiers and 50,000 users. TraxSolutions seamlessly integrates with Army Knowledge Online to provide individualized training information at the soldier level.

Ananda Roberts, President of nFocus Software, said, "Everyone at nFocus Software is proud to continue support of the United States Army, by helping to ensure that our soldiers and units have the training they need to accomplish their missions."

TraxSolutions Student Management System is part of the TraxSolutions training management suite from nFocus Software, providing training organizations, schools, and school districts with the ability to track and merge detailed student information. Core capabilities of the Student Management System include skill analysis, data aggregation, class scheduling, and student management.

The Digital Training Management System (DTMS) is a web-based commercial-off-the-shelf software application customized to implement FM 7-1 Battle Focused Training. Optimized for use at brigade level and below, the DTMS provides the ability to plan, resource, and manage unit and individual training at all levels. It compiles and displays a unit roll-up of training conducted through a series of customizable tabs to track weapons qualification, Army physical fitness tests, AR 350-1 mandatory training, and deployment tasks from enlistment to retirement.

nFocus Software is the leading provider of data collection and outcome measurement software to the public sector. nFocus Software's solutions track and measure outcomes for more than 2.5 million children across America and Canada. Our customers include non-profits, Fortune 500 companies and government agencies. Our solutions capably serve organizations ranging from local organizations serving fewer than 100 individuals, to statewide deployments, to the United States Army, where our solutions track the global training and mission readiness of all 1.2 million soldiers.
