Train Like You Fight. Fight Like You Train. Failure is Never an Option

nFocus Solutions delivers advanced software solutions that accurately monitor and assess the performance of military personnel, as well as entire operational units in real-time.

Driving Training Intelligence

Because our technology is powerful and scalable, we are able to assist our customers in streamlining their entire training process and increase operational efficiencies. This allows mission commanders to quickly determine which personnel and/or units are the best-prepared for any given mission scenario, while simultaneously saving our military critical time, money and resources.

As a Prime Contractor for the U.S. Army's Combined Arms Center (CAC) Omnibus Contract, we have two U.S. Army-wide advanced training programs -- the Digital Training Management System (DTMS) and the Unit Individual Training Management Module (UITM). These systems have become the advanced-training "backbone" for the U.S. Army, ensuring 1.4 million Soldiers and civilians around the world are mission ready.

Student Management Server

TraxSolutions® Student Management Server is an Enterprise-class system for managing training requirements, delivery and performance. It is the foundation of the U.S. Army's Digital Training Management System (DTMS) and is a powerful management tool that maximizes the benefits of Enterprise training programs.

Curriculum Management Server (CMS)

The Curriculum Management Server is a web-based system for creating, managing and publishing training doctrine and standards. Used by the U.S. Army to manage its Combined Arms Training Strategies, CMS supplies management and development capabilities across a multitude of curriculum development functions.

nSite Knowledge Management Server

An interactive and web-based tool for use across an organization, nSite enables organizations of all sizes to leverage the distributed knowledge of their employees, vendors, students, partners and even the public at large, to identify best and promising practices across a wide range of functional areas.

Tactical Classroom

Designed to work with deployed training and simulation systems, Tactical Classroom is an embedded Learning Management System. This system offers embedded student and performance management within the Marine Corps' Combat Operations Centers.

Classroom Server

TraxSolutions Classroom Server is a service-based Enterprise Learning Management System that enables large organizations to centrally manage their online learning programs. It removes the need to replace existing systems by creating a consolidated and centralized learning environment.

Catalog Server

TraxSolutions Catalog Server is a web-based system for cataloging and managing content across dispersed systems and networks, by working seamlessly with Classroom Server to create a robust yet efficient Enterprise Learning Management System.

Performance Management Server

TraxSolutions Performance Management Server is a service-based system that collects data from a wide variety of business and tactical systems, giving leaders and managers a holistic view of their organization's operations and performance.

Depth and Breadth

Role as Prime Contractor

- Combined Arms Center (CAC) Omnibus
- Digital Training Management System (DTMS)
- Combined Arms Training Strategy (CATS)
- National Simulation Center and Joint National Training Center Support Contract (NSCJNTCS)
- Mission Focused Integrated Training (MFIT)

Role as Subcontractor

- Intelligence Electronic Warfare Tactical Proficiency Trainer
- Federal Law Enforcement Training Center
- Consolidated Product Line Management
- Exportable Training Capability – Instrumentation System
- Combined Arms Center Omnibus – Suite 1
- Digital Training Management System – Combined Arms Training Strategies
- Army Training and Leader Development
- U.S. Army Fires Center of Excellence
